SUMMARY

A Data Analyst with 3.8 years of experience, skilled in transforming complex data into actionable insights. Proficient in data cleaning, analysis, and visualization using tools like Excel, SQL, Python, and Tableau. Experienced in working with cross-functional teams to drive data-driven decisions, improve business processes, and enhance operational efficiency. Strong analytical thinking, problem-solving abilities and a keen eye for detail, with a proven track record of delivering accurate and impactful reports.

WORK EXPERIENCE

AiVariant, Hyderabad, India, Data Science Intern Oct-2023- Dec2024

- Developed comprehensive knowledge of data and a deep understanding of business problems.
- Conducted thorough data cleaning and preprocessing, as well as exploratory data analysis.
- Built predictive models using machine learning algorithms, assessed model performance, and provided clear documentation for optimal outcomes.

TCS-Barclays UK, Business Analyst Jan 2021 - Present

- Analyzed data and provided meaningful insights to stakeholders for better decision-making.
 - Conducted analysis to identify issues in the process of organization and individual data addition into the customer footprint(UI) and suggested changes in the matching linking process.
 - Cleaned, transformed, and validated raw data from multiple sources, reducing data processing errors by 25% and ensuring a 95% accuracy rate in data analysis
 - Utilized SQL and Python libraries to extract, merge, and analyze data, aiding informed decision-making.
 - Communicating with end-users and stakeholders regarding issue status, resolutions, and preventive measures.
-

SKILLS

- **Programming Language:** Python, SQL, Pyspark
 - **Data Analysis:** Numpy, Pandas, Scipy
 - **Data Visualization:** Seaborn, Matplotlib, Plotly, Microsoft PowerBI, Tableau
 - **Machine Learning:** Foundation and Application, Advanced Algorithms, NLP, Neural-Network, Text Mining, Time Series Analysis, Forecast Analysis
 - **Cloud Technologies:** Azure Cloud, ADF, ADLS, Databricks, Stream Analytics, COSMOS DB, Analysis Services, Azure Functions, Serverless Architecture, ARM Templates
-

PROJECTS | github.com/PranavlovesData/My_Projects/tree/main

Book Recommender System:

- Built a personalized book recommendation system using collaborative filtering and a web application framework.
- The system accurately predicts customers' interests and recommends popular books, leading to increased customer satisfaction and loyalty.

Predicting Solar Power Generation:

- Built an application that takes all necessary parameters and gives customers an accurate picture of solar power generation based on historical data
- Our model predicts solar power generation based on key variables, enabling optimized performance, increased efficiency, and cost savings.
- This enhances decision-making and boosts our company's profitability in the solar industry.

EDUCATION

Oct 2016 - Aug 2020

Bachelor of Engineering in Mechanical Engineering

GGITS, Rajiv Gandhi Proudhyogiki Vishwavidyalaya

CERTIFICATION

AZ-900: Azure Cloud Fundamentals

DP-900: Azure Data Fundamentals

PL-300: Microsoft Power BI Data Analyst

ExcelR: Data Science Certification, ExcelR Solutions

Udemy: Peirian Training Institute: Python for Data Science and ML.

ADDITIONAL INFORMATION

- **Languages:** English, Hindi
